4907931	UNITED KINGDOM	1	PHP DEVELOPER	<p>Required profile: PHP Developer No of available vacancies: 1 Place of work: Unit 3, Greenway Business Centre, Doncaster Road, Bristol BS10 5PY Deadline for applications: ASAP Description of the task: We need an enthusiastic PHP web developer with a strong understanding of Object-Oriented PHP. Tasks include the occasional large project, multiple mini-projects, adding new features to existing systems, and fixing bugs that have come to light. A notable amount of existing code is in ASP and legacy PHP and needs to be recoded in OOP PHP. We have a large amount of legacy code, but new projects will be written in PHP OOP e.g. using the NetBeans PHP IDE, the CodeIgniter MVC framework and the bootstrap framework for external websites. We are looking for a dependable PHP developer to write logical, well-commented code and to build on and improve existing systems. Create robust bespoke systems to increase efficiency in the business. Create intuitive and fast user interfaces - for both internal staff and external customers. Balance the feedback of users with the requirements of your manager, and manage your workload to ensure an appropriate balance between time, quality and budget. You must also be willing to muck in with technical support although this isn't the main focus of the role. Work within a culture of good organisation and clear, timely reporting. 20151222733	Francia	30	YFEJ 5.0-DATA SCIENTISTS	The role of the data scientist is to participate in the identification, implementation and growth of the it solutions. The data scientist is part analyst, part artist: comfortable working as a software engineer and a quantitative researcher; the Data Scientist is capable of staring at data and spotting trends, wanting to learn and bring change to an organization. The data scientist explores and examines data from multiple disparate sources and sifts through all incoming data with the goal of discovering a previously hidden insight, which in turn can provide a competitive advantage or address a pressing business problem. The data scientist does not simply collect and report on data, but also looks at it from many angles, determines what it means, then recommends ways to apply the data. The data scientist is inquisitive: exploring, asking questions, doing 'what if' analyses, questioning existing assumptions and processes. Armed with data and analytical results, the data scientist then communicates informed conclusions and recommendations across an organization's leadership structure. Skills - Understand the business of the customer and understand the main performance indicators that can be leveraged to improve activity	30/10/2017	eures@afolmet.it
